## Create SQL Database

Microsoft

Basics **Networking** Security Additional settings Tags Review + create

Configure network access and connectivity for your server. The configuration selected below will apply to the selected server 'srisai123' and all databases it manages. [Learn more](#)

### Firewall rules

The settings displayed below are read-only. They can be modified from the "Firewalls and virtual networks" blade after database creation. [Learn more](#)

Allow Azure services and resources to access this server

No Yes

### Private endpoints

Private endpoint connections are associated with a private IP address within a Virtual Network. The list below shows all the private endpoint connections for this server. Note that private endpoint connections are defined at the server level and they provide access to all databases in the server. [Learn more](#)

+ Add private endpoint

Name	Subscription	Resource group	Region	Subnet
------	--------------	----------------	--------	--------

Click on add to create private endpoint
